

Data leakage

A moment to reflect

- How bad it is?
- Whats the public opinion?
- To exploit or not to exploit

Contents

- Leakage types and examples
- Competition specific. Leaderboard probing
- Concrete walkthroughs

Leaks in time series

- Split should be done on time.
 - In real life we don't have information from future
 - In competitions first thing to look: train/public/private split, is it on time?
- Even when split by time, features may contain information about future.
 - User history in CTR tasks
 - Weather

Unexpected information

- Meta data
- Information in IDs
- Row order
